

NOT FOR SISSIES!

Battleaxe PRO[®]

MADE IN AUSTRALIA

KILLS ANYTHING WITH 6 OR MORE LEGS.

The **ORIGINAL** tool of choice trusted by pest management professionals in Australia. **BattleaxePRO** is a professional solution built with the characteristics you'd expect:

- the largest list of approved pests of any aerosol in Australia gives you the ultimate 'pest control in a can'
- a unique 360 degree valve allowing the can to be sprayed at any angle (even upside down)
- a unique powerful 3 way mix of propoxur, tetramethrin, and piperonyl butoxide
- Extra large 420 g industrial size can
- a new flip-up-trigger actuator

Don't leave for a job without it. Not for sissies!

PROFESSIONAL SOLUTIONS

BattleaxePRO[®] Aerosol - the original tool of choice.

BattleaxePRO[®] Aerosol has a number of advantages over conventionally packaged insecticides. These include efficiency, convenience, and less waste with no need to dilute ingredients. This is the superior aerosol product-of-choice for pest management professionals.

Ideal for detection

Cockroach infestations are not always obvious during the day, and BattleaxePRO[®] with its convenient Mark II flip up extension crack and crevice nozzle is ideal for detecting and flushing out infestations.

Crack and Crevice

BattleaxePRO[®] gives long residual action and allows the operator to treat surfaces within cracks and crevices where significant contact with the insects is more likely to occur.

BattleaxePRO[®] Aerosol Features:

- Best flushing action on the market
- Fastest knockdown
- Residual activity
- Penetrating vapour action
- Flexible nozzle extension for crack and crevice treatment
- Unique 360 degree valve that allows the can to operate at all angles - even upside down
- Convenient to use in difficult areas
- Large industrial size 420 g pack
- Proven powerful three way mix of propoxur, tetramethrin, and the potent synergist, piperonyl butoxide
- Controls bed bugs, ants, spiders, flies, mosquitoes, silverfish, clothes moths, carpet beetles, cockroaches, millipedes, earwigs, slaters, and European wasps.

Toxicology

BattleaxePRO[®] Aerosol is placed in Schedule 5 of the Poisons Schedule and carries a CAUTION label. The active ingredients are rapidly metabolised and excreted from mammalian systems.

Made in Australia

BattleaxePRO[®] is manufactured by a family owned 100% Australian business based in Melbourne. The tin plate used to make the can is manufactured and supplied by a family owned 100% Australian business based in Sydney. BattleaxePRO[®] formulation was developed by Sundew Solutions, a family owned 100% Australian company.

BattleaxePRO[®] Aerosol, sprays at any angle.

The can is fitted with a special 360 degree valve that allows the pack to be used at any angle giving the pest controller access to every nook and cranny that pests could be hiding in.

BattleaxePRO[®] Aerosol has a unique valve that allows the continuous flow of spray at any angle - thus increasing the flexibility of use for pest management professionals. Getting into those tight corners and places in and around shelving has never been easier. Don't settle for inferior products that aren't designed for pest managers.

It's okay to spray

BattleaxePRO[®] utilises the latest in propellant technology and is CFC (chlorofluorocarbon) free. You can spray with confidence knowing BattleaxePRO[®] is not negatively impacting on the environment or negatively affecting the ozone.

New Mark II Flip-up Nozzle and Trigger

BattleaxePRO[®] features the latest Mark II flip-up nozzle/trigger assembly with safety tab to prevent accidental activation while in your carry caddy. The extension nozzle can be flipped down to provide optimum spray dispersion from the front when you need maximum surface coverage, or flipped up when you need to treat into cracks and crevices. A large bore internal diameter of the extension tube prevents spluttering and 'water pistol spray effects'. The Mark II extension nozzle on BattleaxePRO[®] provides an even dispersion of insecticidal droplets into the treated void or area. This gives BattleaxePRO[®] the superior vapour and flushing action for your successful pest service treatment.

420 g Value Pack

BattleaxePRO[®] Aerosol comes in a 420 g industrial size pack specifically for professional pest management use.

Better Performance. Better Value.

STRENGTH FULL

PRODUCT SPECIFICATIONS

Active constituents: Propoxur 20 g/kg
