

YOU'LL LOVE THE NEW EXPANDED LABEL CLAIMS. PESTS WON'T.

ANTagonist[®] PRO

POLYMER ENHANCED BIFENTHRIN TECHNOLOGY

WEAPONS UPGRADE.

Over four years of extensive research have led to a vastly improved product label - the most extensive of any product of this class in Australia.

With ANTagonistPRO pest management professionals now have the broadest label covered in one pack.

Uniquely formulated to be Australia's best ant solution.

The ANTagonistPRO formulation was developed from the ground up based on feedback from pest management professionals in Australia requesting a solution to their number one issue - call-backs on ant jobs. ANTagonistPRO is totally unique, boasting Australia's only polymer enhanced bifenthrin technology.

Powered by Polymer Enhanced Formulation Technology.

ANTagonistPRO incorporates the innovative Polymer Enhanced Technology to overcome harsh environmental factors that breakdown ordinary pyrethroid treatments. Realising its unprecedented performance in comparison to standard bifenthrin formulations, pest management professionals requested additional research to expand the pest claims to make this a 'must-have' product in every technician's vehicle.

Approved for Red Imported Fire Ants and Yellow Crazy Ants.

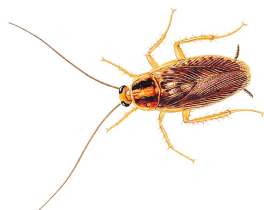

Following years of research in the field ANTagonistPRO is now approved for treating Red Imported Fire ants and Yellow Crazy Ants. ANTagonistPRO not only kills the ants that are exposed, but also controls the colony for total nest elimination

Combining functionality with greater flexibility.

Pest management professionals demand products that can be applied to key pests in flexible situations - one product that can do multiple tasks provides better efficiency.

Sundew Solutions undertook extensive field trials to vastly expand the pest profile for ANTagonistPRO, while developing other target application possibilities. The ANTagonistPRO label now boasts exciting new claims for:

- General Pests
- Specific Termite uses
- Turf Pests
- Roses, Carnations and other ornamental Plant Pests

PRODUCT SPECIFICATIONS

Active constituent:	Bifenthrin 80 g/L
Formulation type:	Polymer enhanced SC
Pack Sizes:	1 L and 5 L
Chemical group:	Pyrethroid
Schedule:	S6

Pest Claims: For the control of ants (including Red imported fire ant & Yellow crazy ant) and a broad range of other urban pests, and for the control of a range of pests in ornamental plants, and turf as specified in the directions for use.

Key Features:

- Advanced Polymer Synthetic Pyrethroid technology
- Now approved for red imported fire ant and yellow crazy ants
- Ideal for hard surfaces e.g. concrete, brickwork etc
- Suited to extreme surfaces in commercial situations
- Excellent turf and plant safety
- Fast acting with excellent residual control

GROUP 3A INSECTICIDE

General urban pests.

ANTagonistPRO is approved for all species of ants (including Red Imported Fire Ant and Yellow Crazy Ant), spiders, wasps, cockroaches, mosquitoes, biting midges, fleas, flies and ticks.

Specific termite uses.

ANTagonistPRO is approved for protection of service and fence posts, as well as direct treatment for eradication of termite nests.

Turf pests.

ANTagonistPRO is approved for all species of ants (including Red Imported Fire Ant and Yellow Crazy Ant), lawn armyworm, sod webworm, Argentine stem weevil, billbug, and African black beetle adults.

Roses, carnations and other ornamental plant pests.

ANTagonistPRO is approved for treatment of two spotted mite, aphids, caterpillars, whitefly, poinsettia white fly, mealy bug, plague thrips, and cutworms.

Approved for Indoor Use.

The unique polymer formulation technology found in ANTagonistPRO makes it ideally suited to tough, dirty and extreme conditions found in commercial situations. In restaurants, where there are daily wash-downs, greasy surfaces and adverse conditions, the polymer tech found in ANTagonistPRO is the only answer.

Controlling pests in a genuinely different way.

ANTagonistPRO was designed with its polymer technology to afford the most robust treatment in a variety of harsh outdoor situations.

Standard outdoor chemical treatments are quickly broken down by:

- Ultraviolet rays from the sun
- Rain
- Heat from the sun
- pH of the surface the chemical is applied to

ANTagonistPRO represents research and development into cutting-edge formulation technology incorporating the only polymer enhanced bifenthrin available to pest management professionals in Australia.

Perfect for tough commercial jobs

ANTagonistPRO is an excellent broad spectrum insecticide

Better Performance. Better Value.

GREATER CONTROL OF MORE INSECTS

ANTagonistPRO is now labelled to control more than 27 insects:
